undergraduate degree program

B.S., graphic information technology

an optional accelerated program offers high-achieving students an opportunity to earn both a bachelor’s and a master’s degree within five years

The bachelor of science in Graphic Information Technology (GIT) program prepares students for a seamless career as a graphic technologist. The cross-media nature of the graphic information industry requires tomorrow’s graduates to understand the full spectrum of graphic technology and current business practices. After graduation, you will be ready for careers in a broad range of fields including web design/development, print design and digital publishing, commercial photography/video and technical imaging.

At ASU’s Polytechnic campus, you will have access to state-of-the-art, industry-standard equipment in dedicated student labs. And you will work closely with faculty and mentors who are industry leaders in all fields of graphic information technology.

The GIT major on the Polytechnic campus is eligible for the Western Undergraduate Exchange (WUE) program. Students from Western states, who select this major and campus, may be eligible for reduced nonresident tuition. See more information and eligibility requirements on the Western Undergraduate Exchange (WUE) program at students.asu.edu/admission/wue.
